

SIMIT RAI

Unity Game Developer

Kalanki-14, Kathmandu, Nepal | +9779814719224 | simitchamling@gmail.com | [Portfolio](#) | [GitHub](#)

SUMMARY: Game Developer and Designer with experience building and publishing 3D/2D games across WebGL and mobile platforms accumulating 150,000+ total gameplays. Proficient in C#, Unity, UI/UX prototyping, and core gameplay mechanics. Strong background in educational and indie game development, with a growing interest in casual game design, rapid onboarding, and interactive ad concepts. Looking to contribute strong programming and problem-solving skills as a Unity Game Developer.

WORK EXPERIENCE: **Unity Game Developer** December 2024 – December 2025
Chimpvine (Danson Solutions), Gairidhara

- Developed educational games for Prek-Grade 8 students in Unity for both WebGL and Android platforms.
- Designed and implemented responsive UI layouts, onboarding, gameplay mechanics, animations, and interactive learning systems.
- Integrated Firebase Authentication and database services to support user accounts, and cloud-saved progress.
- Integrated WebGL games with custom backend services using REST APIs.
- Collaborated with designers, artists, and developers using Agile workflows and Git/GitHub version control.

Indie Game Development January 2024 – Present

- Designed, developed, and published multiple 3D/2D WebGL and mobile games, reaching 150,000+ organic gameplays on Y8.
- Implemented monetization systems using Unity Ads, AdMob and Y8 Ads.
- Managed complete production pipeline including development, testing, deployment, updates, and maintenance.
- Designed gameplay loops focused on retention and engagement.

TECHNICAL SKILLS:

Programming & Engines

- C#, Unity, OOP, SOLID Principles, Design Patterns, ScriptableObjects, New Input System

Game Design & UX

- Core Gameplay Loops, Onboarding & Tutorial Design, UI/UX, Figma, Krita

Monetization & Backend

- Unity Ads, Y8 Ads, Firebase, REST API Integration, JSON Serialization

Tools & Deployment

- Git, GitHub, Visual Studio, Android Build & Deployment, Google Play Console, Performance Optimization

PROJECTS:

- Planet Merge (Playable Ad, Portfolio Demo): Designed a short puzzle game exploring rapid onboarding and end-card Call-To-Action (CTA) mechanics. [Portfolio Link](#)
- AR Indoor Navigation (Hackathon Winning Project): An AR wayfinding app that guides users through a multi-department building. [Project Link](#)
- Desert Wheels (WebGL): A thrilling high-speed racing game available on Y8. [Game Link](#)
- Shape Explorer (Mobile game): Shooting puzzle game published on Playstore featuring Firebase Authentication and Database integration. [Game Link](#)
- View more projects here: [Portfolio](#)

EDUCATION:

**Bachelor of Information Technology
(BIT-Undergraduate)**

2023-2027

Phoenix College of Management, Lincoln University
